DEPOT CONFIGURATION AND REPAIR SERVICES

ISS Solutions offers custom configurations and repairs of desktops, laptops, mobile devices, and servers. Our services also extend to printer and peripheral repairs. As a single vendor, ISS Solutions can support the IT infrastructure in your workplace.

ISS Solutions offers custom configurations and repairs of desktops, laptops, mobile devices, and servers. Our services also extend to printer and peripheral repairs. As a single vendor, ISS Solutions can support the IT infrastructure in your workplace.

SERVERS

DESKTOPS AND MOBILE DEVICES

PRINTERS

PERIPHERALS

SPARE PARTS INVENTORY AND REPLACEMENT DEVICES

Sourcing configurations and repairs from a single vendor can cut down on time and money spent coordinating these efforts and allow you to redirect your valuable resources to higher priority projects. ISS Solutions takes the time to work with you to identify the services your business requires to succeed. Our team will provide a customized, low-cost solution, including unique service level agreements designed to meet your business demands.

CONFIGURATION

DEPLOYMENT

OVERNIGHT AND EXCHANGE REPAIRS

CUSTOMIZED SERVICE LEVEL AGREEMENTS (SLAs)

The benefits of turning to ISS Solutions for your technology management are visible and immediate. Your company can focus on its business-critical issues, not your IT infrastructure. The ISS Solutions team will eliminate the guesswork, troubleshooting, and daily challenges that are inherent with maintaining the technology that you rely upon. Your time can be better spent concentrating on the challenges of your business.

ISSSolutions®

DEPOT CONFIGURATION AND REPAIR SERVICES

ABOUT US

For over forty-five years, ISS Solutions has provided thoughtful leadership, industry best practices, and comprehensive technology and end-user support services. Our portfolio of services includes an IT service center, IT infrastructure support, IT strategy/planning, technology/services procurement, managed print services and technology staffing solutions.

Our goal is long-term partnerships focused on our clients' success. We'd like you to see your company join the roster of clients who have been with us for over a decade.

ISS Solutions employs technicians and engineers certified in a range of industry standard programs, such as CompTIA's A+ and CompTIA's Network+, and manufacturer certifications from companies such as HP, Lenovo, Apple, and OKI Data. These credentials enable us to perform warranty repairs on a wide range of devices.

Contact ISS Solutions to have your configurations and repairs handled with precision and expertise.

Service you can count on. Experience you can depend on. Expertise you can trust.

Depot Facilities

Our two modern depot facilities have 50,000 square feet of secure, video-monitored space, with proxy tag entry and 24/7 theft deterrent systems. Count on our inventory management expertise, multi-shift capabilities, and regulatory compliance to deliver the services you need.
